Why Join **CHA**?

- Exciting, diverse projects
- Work side by side with experts in the field
- Be part of a team's efforts that shape our aspiration statement of responsibly improving the world we live in
- Professional and personal growth opportunities including career paths
- Training and continuing education
- Rewards and recognition
- Paid time off
- Medical, dental, vision, and other benefits including 401(k)

Committed to Health & Safety

The health and safety of our employees is a top priority at CHA and is central to our aspiration of *responsibly improving the world we live in*.

CHA also has an extensive Summer Internship Program that is geared towards students going into their junior and senior year. Our interns have great opportunities to participate in learning experiences for development and skill improvement. Some opportunities include project site visits, performance of true entry-level duties, teamwork, research project presentations and more. The CHA Summer Internship Program is a fantastic opportunity for students to be considered for full-time employment post-graduation.

Civil Engineering

CHA takes pride in our civil engineers who rely on unique designs, innovative materials, and modern construction technologies to create structures, foundations and other projects that are sensitive to both the public and the bottom line. Our expertise spans the full project cycle. With thousands of design projects under our belt and offices throughout the United States, we have the relationships and experience to smooth the path to project completion.

Aviation Services

For more than half a century, CHA has provided planning, design, construction, and asset management services to the nation's top airports. We have the diversity of technical expertise and the capacity to assist in virtually any engineering, architectural, or construction support service required. We have an in-depth understanding of state and federal regulations, as well as the technical requirements and challenges faced by modern airports.

Transportation (Highways, Traffic, Rail, Structures)

CHA aims to enhance our nation's infrastructure, ensuring goods are shipped, safety and services provided, and the economy vitalized. Our highway, traffic, rail and structural specialists use knowledge gained from thousands of projects to develop unique, compatible and lasting solutions that meet our constantly changing transportation needs. We plan, design, inspect, and help maintain and construct our nation's most valued infrastructure assets by providing solutions for public and private transportation owners, agencies and authorities in more than 16 states.

Water/Wastewater

CHA has developed thousands of water-related projects, each taking into account our clients' unique environmental, water quality, permitability, and funding concerns. Our water and wastewater management offerings include full engineering and support services for industrial and municipal wastewater treatment systems from initial planning through permitting, design, bidding, construction administration, start-up, certification, and ongoing operational assistance.
