## Why Join **CHA**?

- Exciting, diverse projects
- Work side by side with experts in the field
- Be part of a team's efforts that shape our aspiration statement of responsibly improving the world we live in
- Professional and personal growth opportunities including career paths
- Training and continuing education
- Rewards and recognition
- Paid time off
- Medical, dental, vision, and other benefits including 401(k)

## Committed to Health & Safety

The health and safety of our employees is a top priority at **CHA** and is central to our aspiration of *responsibly improving the world we live in*.

**CHA** also has an extensive Summer Internship Program that is geared towards students going into their junior and senior year. Our interns have great opportunities to participate in learning experiences for development and skill improvement. Some opportunities include project site visits, performance of true entry-level duties, teamwork, research project presentations and more. The **CHA** Summer Internship Program is a fantastic opportunity for students to be considered for full-time employment post-graduation.

## We Are Seeking Talent for Structural Opportunities

### **General Structures**

CHA's structural engineers have the ability to solve clients' needs, utilizing creative solutions to design efficient buildings and structures that safely support the loads and resist the forces imparted on them. Governmental, industrial, manufacturing, institutional, municipal, sports, water/wastewater, aviation, and communication are only a fraction of the market sectors we have the experience and ability to service.

### **Transportation Structures**

CHA's structural professionals incorporate collaborative and diverse thinking with practical and cost-effective designs that responsibly improve mobility and safety. We have inspected, designed, managed and overseen the construction of a wide array of grade separated crossings, retaining systems, and conveyance structures throughout the United States. Our transportation structure portfolio encompasses all project types from simple culverts to major award-winning signature structures, from historical arches and trusses to timber covered bridges, and everything in between for pedestrians and vehicles alike.
