

ENVIRONMENTAL ENGINEERING — IS MY — PASSION

Albany Landfill Habitat Restoration
Albany, NY

At **CHA Consulting, Inc.**, Environmental Engineers work within two different groups including:

Environmental, Health & Safety

When it comes to environmental issues, the goal is always to minimize risk. CHA achieves this goal by having intimate knowledge of environmental regulations and properly assessing site conditions and applicable mitigation approaches. We understand our clients' goals and clearly communicate with them through the course of their sensitive environmental projects. We provide creative solutions to help clients investigate environmental problems, design cleanup solutions, and comply with regulatory requirements.

Water/Wastewater

Ensuring water is clean and safe is one of the most important services that each community can provide. To that end, CHA has developed thousands of water-related projects, each taking into account our clients' unique environmental, water quality, permitability, and funding concerns. Our resume covers miles of pipelines, innovative treatment systems, and an army of satisfied clients. Within our ranks are true experts—professionals able to assess, plan, design, and construct the required infrastructure.

Responsibly
Improving the
World We Live In

Why Join CHA?

- Exciting, diverse projects
- Work side by side with experts in the field
- Be part of a team's efforts that shape our aspiration statement of responsibly improving the world we live in
- Professional and personal growth opportunities including career paths
- Training and continuing education
- Rewards and recognition
- Paid time off
- Medical, dental, vision, and other benefits including 401(k)

Committed to Health & Safety

The health and safety of our employees is a top priority at CHA and is central to our aspiration of *responsibly improving the world we live in*.

CHA also has an extensive Summer Internship Program that is geared towards students going into their junior and senior year. Our interns have great opportunities to participate in learning experiences for development and skill improvement. Some opportunities include project site visits, performance of true entry-level duties, teamwork, research project presentations and more. The CHA Summer Internship Program is a fantastic opportunity for students to be considered for full-time employment post-graduation.

We Are Seeking Talent for Environmental Opportunities
